

Strategy Essentials

See Further. Plan Smarter.

Solve complex problems with more confidence.

The ability to think strategically is a quality of great leaders. It lets them identify which business activities will move a group or an organization from its present state to an envisioned future.

But only 8% of managers have the skills of a strategic leader.

A shortage of strategic thinkers can be catastrophic. Without a strategic leader charting the course, a team, department, or company focuses solely on short-term priorities and misses longer-term opportunities. Success becomes a matter of luck while failure is the more likely outcome.

Blanchard's Strategy Essentials teaches your leaders how to gain a bird's-eye view of the strengths and weaknesses of a team or organisation. Spot challenges and opportunities before it is too late to act. And allocate resources where they'll yield the greatest return.

Thinking strategically is imperative for success. Strategy Essentials will elevate the leadership skills of your people to meet the demands of the moment.
