

Training for Trainers Agenda, 2 Day Session

Session Overview

Teaming in with your collegial, interactive trainer cohort you will find that your Training for Trainers Certification (T4T) session eases you in to learn, practice and become authorised to facilitate The SLII® Experience programme within your employing organisation. The process is designed to help you accelerate your learning and enable you to feel competent, confident, motivated and supported. Together in your cohort you will review the programme-specific skills, and practice using the facilitator and participant resources to deepen your content knowledge, and demonstrate delivery skills. As a trainer group you will share insights to accelerate mastery of the concepts and programme activities, creative implementation, sustainability strategies, and game plans for measurable impact. Through experiential practice and individual feedback, you will have the opportunity to hone your delivery and facilitation skills, and discover specific, preferred methods of implementation. As an outcome, you will be set to roll-out The SLII® Experience programme within your employing organisation with researched and reliable proprietary copyright content to a pattern of economic and effective delivery.
